

## CONVERSION ABM Main Drive TO FREQUENCY DRIVEN MOTOR

These mounting brackets need  
to be reused

If you are familiar with the Soudronic ABM Bodymaker you know that the Main Drive Variator is hard to replace. These units are absolute and rebuild parts for them are expensive and hard to get.

We offer a different option: The Conversion ABM Main Drive to Frequency Driven Motor. Our conversion kit utilizes low maintenance items with parts, which are readily available.

### INCLUDED IN THIS KIT:

- Allen Bradley Powerflex Frequency Inverter.
- American Made Motor with Hand Wheel and mounting Brackets
- TeperLock Pulleys for Main Drive and Spline Shaft with Belt
- 10K 10 turn Pot for Speed adjustment

### **Please call for pricing**

The conversion amounts to a substantial savings over the cost of a new or Rebuild Variator.

Installation is not included. We highly recommend that you have one of our technicians install the first unit. Only then can we guarantee trouble free installation and operation. Installation takes approximately 12 hours.

MRW Inc., 100 Buckshollow Rd., Mahopac, NY 10541 Tel 845-628-1445 FAX 845-628-1344
